Hello!

Welcome to the Google Grants Program!

Now that your AdWords account is active, you'll need to regularly monitor the performance of your campaign by logging into your account.

This guide reviews how to manage your AdWords account and get the most from your ads once they are up and running. We included the information that we think will be most relevant to help you get started.

Congratulations, and we hope you make the most of the free advertising!

The Google Grants Team

Google Grants & AdWords – Important program guidelines

I. AdWords account restrictions for Grantees

When navigating your Google Grants account, note that the AdWords system and interface is designed for our paying advertisers. You may find that some features or advertising opportunities may be restricted within your account. It is important to note these key differences between a Google Grants account and a regular AdWords account:

Google Grants accounts:

- Have a daily budget set to \$330 dollars, which is equivalent to about \$10,000 per month
- Have a maximum cost-per-click (CPC) limit of \$1.00 USD
- Only run keyword-targeted campaigns
- Appear only Google.com, and will not display on search or content networks
- Only run text ads

II. Cost & budgeting for Grants accounts

Google Grants provides select 501(c)(3) nonprofits with free advertising via the AdWords program. This program is at no cost to you or your organization, with no obligation to pay for advertising in the future.

However, since you are using the same account interface as a paying AdWords advertiser, you will be working with sections in your account referring to cost and budgeting. The information below will explain how this terminology relates to your Google Grants account.

Cost-per-clicks (CPC's) and bidding

If you have ever used AdWords as a paying customer, you know that advertisers are charged a certain cost-per-click (CPC) whenever a user clicks on their ad, e.g. 30 cents per click. As a result, advertisers set maximums that they want to pay per click and also an overall campaign budget to ensure they are appropriately spending their advertising dollars.

As a Google Grants recipient, you will not be charged for any clicks to your ads. Each account is allocated a maximum CPC of \$1.00, which is used to rank your ads in the AdWords auction.

Keep in mind, that due to quality factors, some keywords will not remain active with a maximum CPC of \$1.00. Please visit the 'Ad performance and optimizing your campaigns' section of this guide to learn more.

Daily Budget Limit

Google Grants accounts have a set daily spend limit of \$330 per day, which is equivalent to about \$10,000 in spend per month. This means that we will show your ads as much as possible each day, up until your account accrues about \$330.

Keep in mind that the daily spend limit is an automated cap within the Google Grants system.

If you were to set your campaign daily budget above \$330, your account will still only be allowed \$330 in traffic.

Please note: Not all Google Grants account will receive enough traffic to accrue \$330 in free advertising per day. Depending on the reach, size, and type of organization, some grantees will reach \$330 per day in traffic, while most only use a small portion of this allocated budget.

III. Length of Grant

We require organizations in the Google Grants program to be actively engaged in their AdWords account. As long as your organization is actively managing the AdWords account, adhering to our program guidelines, and making the most of this award, you shall continue to remain in the Google Grants program.

Please note that Google does reserve the right to terminate your organization's participation in the Google Grants program for any reason without notice at any time. If you are removed from the Google Grants program, your organization will be ineligible, and should not apply again.

Managing your account – Useful tools & navigating your account

I. Navigating your AdWords Account

Within your account, you have one or more campaigns, and in each campaign you can have multiple Ad Groups. To make this easy to navigate, your AdWords account has different compartments or 'tabs':

- **Campaign Management.** This tab is where you control your account, campaigns, Ad Groups, and keywords. The top level shows your performance information for different campaigns. Clicking on a campaign shows Ad Group performance information, and clicking on an Ad Group shows keyword performance information.
- **Reports.** This tab lets you create customized and detailed reports by keyword, ad text, account, and other variables. You can experiment by running different reports to find the ones most useful for you. Google store up to five reports in your Download Center, or you can have them automatically emailed to you.
- **Analytics.** The Analytics tab provides you with advanced tools to track your campaign results and other data. You will need to set-up a free Google Analytics account, if you would like to take advantage of this tracking tool. To learn more, visit <http://www.google.com/analytics/indexu.html>
- **My Account.** Use this tab to control your personal information, such as your login and user preferences. We highly recommend inviting others at your organization to your AdWords account. There should be at least one active contact at your organization for the length of the award.

You can find more detailed information on navigating your account at <http://services.google.com/grants/edu/account/>

II. Making keyword and ad text changes

Now that your account is active, you should be reviewing account statistics and making edits and additions on a regular basis.

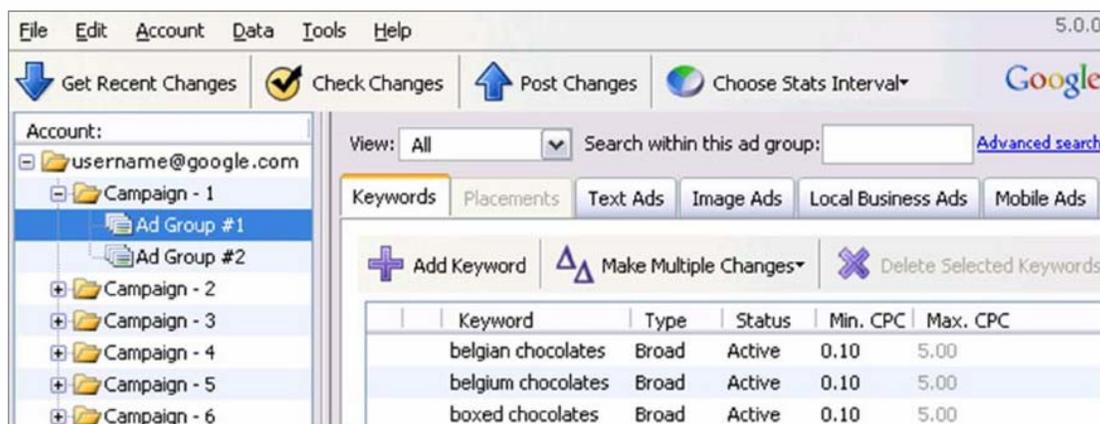

Visit <http://adwords.google.com/support/bin/answer.py?answer=6753> for details about editing various aspects from within your account.

In addition to the standard editing tools within your account, if you need to make changes across different campaigns or Ad Groups, AdWords Editor is a free, campaign management application to help you make these changes with ease and flexibility. You can download your campaigns, make bulk or individual edits offline then upload your changes to your AdWords account.

With AdWords Editor, you can:

- Work offline on your Mac or PC
- Make large scale changes quickly
- Share changes with team members before applying them to your account
- Quickly find and replace terms throughout your account
- Make advanced URL changes
- Sort and view performance statistics
- Add, edit, delete, copy, cut and paste keywords, text ads, Ad Groups and campaigns
- Upload changes to AdWords any time

To download AdWords Editor, visit the AdWords Editor website at <http://www.google.com/intl/en/adwordseditor/> and click 'Download AdWords Editor'. For detailed information about using the application, you can search or browse the AdWords Editor Help Center at <http://www.google.com/support/adwordseditor/>

The AdWords Editor

III. Generating keywords

The Keyword Tool is a great way to generate additional keyword variations and to source negative keywords (see more on negative keywords in Section 2), and it's available directly within your account. Check out the Help Center for Instructions on how you can use this tool:

<https://adwords.google.com/support/bin/answer.py?answer=25918>

Keyword Tool

Use the Keyword Tool to get new keyword ideas. Select an option below to enter a few descriptive words or phrases, or type in your website's URL. [Keyword Tool Tips](#)

Important note: We cannot guarantee that these keywords will improve your campaign performance. We reserve the right to disapprove any keywords you add. You are responsible for the keywords you select and for ensuring that your use of the keywords does not violate any applicable laws.

Results are tailored to [English, United States](#) [Edit](#)

How would you like to generate keyword ideas?

Descriptive words or phrases
(e.g. green tea)

Website content
(e.g. www.example.com/product?id=74893)

Enter one keyword or phrase per line:
disaster relief

Use synonyms

disaster relief agencies	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	Add

IV. Checking for your ads on Google

If you want to check where your ads are appearing on Google search, we recommend you use the Ad Preview tool. This tool shows you ads and search results as they would appear on a regular Google search results page, without accruing extra impressions for your ad and affecting your campaign statistics.

To perform a test search with the Ad Preview tool:

1. Visit <https://adwords.google.com/select/AdTargetingPreviewTool>
2. Enter a keyword
3. Enter the domain where you set your ads to show, such as google.com or google.fr
4. Select a display language
5. Select a location. You can choose a location from the drop-down menus, or enter specific latitude and longitude coordinates
6. Click 'Preview ads'

The search results and ads appear as they would on Google, except the links on the preview page aren't clickable.

The screenshot displays the Ad Preview Tool interface. At the top, it says "Ad Preview Tool" and "Enter a keyword, then select a Google domain, display language, and location to preview ads." The form includes fields for "Keyword" (filled with "coffee"), "Google domain" (filled with "google.com"), and "Display language" (set to "English"). The "Location" section has "Country" set to "United States" and "State" set to "All regions within this country". A "Coordinates" field is also present. A "Preview ads" button is highlighted with a red box. Below the form, the search results for "coffee" are shown, including a warning message: "Warning: This page is a tool for AdWords advertisers to test their ads. For full Google functionality return to the Google homepage." The results list includes sponsored links for "Buy Great Coffee", "Starbucks Homepage", and "Coffee - Wikipedia, the free encyclopedia", along with organic search results for "Italian Coffee" and "Tin Tie Bag".

The Ad Preview Tool

Making the most of your campaigns

I. Setting up an effective campaign

It's essentially up to you to organize your campaigns, Ad Groups, and keywords that make the most sense for your organizations goals and website. With a logical structure, you can determine what works and what doesn't. Account structure is a key component to starting strong. Keep reading for information on best practices around structuring your account.

- Step 1: Stick to one goal per campaign
- Step 2: Make Ad Groups out of your keywords
- Step 3: Review, test, and refine

Step 1: Stick to one goal per campaign.

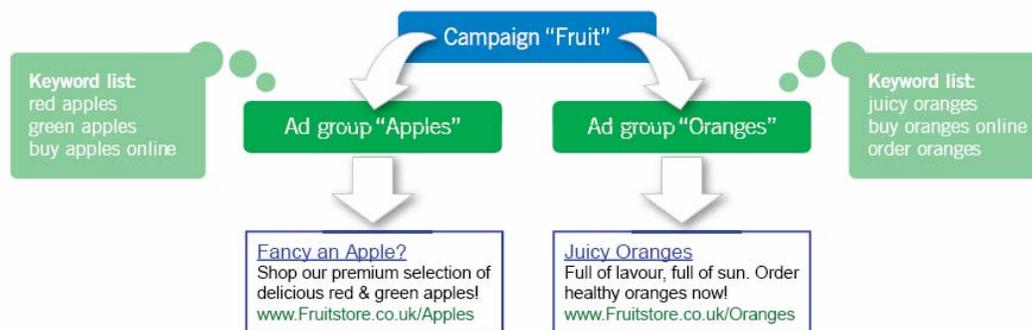

Structure each campaign based on a simple, overarching goal. Ask yourself, "What do I want to achieve with this campaign?" Your answer might be to promote an event or attract volunteers, for example. We suggest you separate campaigns by theme or use the same structure for your campaigns as for your website. If your website is grouped into categories, your job is almost done. It's a good idea to map your structure on paper first.

Step 2: Make Ad Groups out of your keywords.

Just like your campaigns, organize your Ad Groups by common theme or goal. Think about which keywords you want to use, then group similar keywords together. You should be able to come up with two groups per campaign. Finally, make a distinct Ad Group for each group of keywords.

Step 3: Review, test, and refine.

Review one campaign at a time. Are your keywords logically grouped into Ad Groups? Does the campaign help you achieve a goal? Remember to check your progress and continually refine your keywords and your ad text.

Your Ad Groups, keywords and ad text should be organized in a logical format for the best results

Selecting Keywords

Selecting keywords is one of the most important parts of a successful campaign.

TIP: When you're creating your keyword list remember negative keywords, which will help you create more targeted ads and reach the right audience! Negative keywords can be set at the Ad Group and campaign level. You can find more information on this and decide which level works best for you at:

<https://adwords.google.com/support/bin/answer.py?answer=6635>

Dos and Don'ts for account structure and campaign management

Do...

- create multiple Ad Groups per campaign
- group campaigns by theme, geography or goal
- make it easy to maintain
- continue refining your keywords and ad text

Don't...

- create just one Ad Group and a big list of keywords
- mismatch keywords in one Ad Group
- run dozens and dozens of keywords per Ad Group
- stop checking your campaign statistics

II. Ad performance and optimizing your campaigns

The best way to get higher ranking for your ad is to be as relevant as possible. The more relevant your ad is to searchers on Google, the more likely users will click on it. We use Quality Score to assess the relevance of your keywords. Ads with a higher quality score tend to get more clicks as they are more relevant and thus, are rewarded with higher positions.

What is the Quality Score?

The quality score is based on: the keyword's click-through rate (CTR), relevance of your ad text, historical keyword performance, landing page quality, and other factors specific to your account. You can find more information on how the Quality Score is calculated at <http://www.google.com/support/grants/bin/static.py?page=qualityscore.cs>. Based on this Quality Score, we assign your keywords a minimum bid you must pay per click in order to keep your ad running for any one of your keywords.

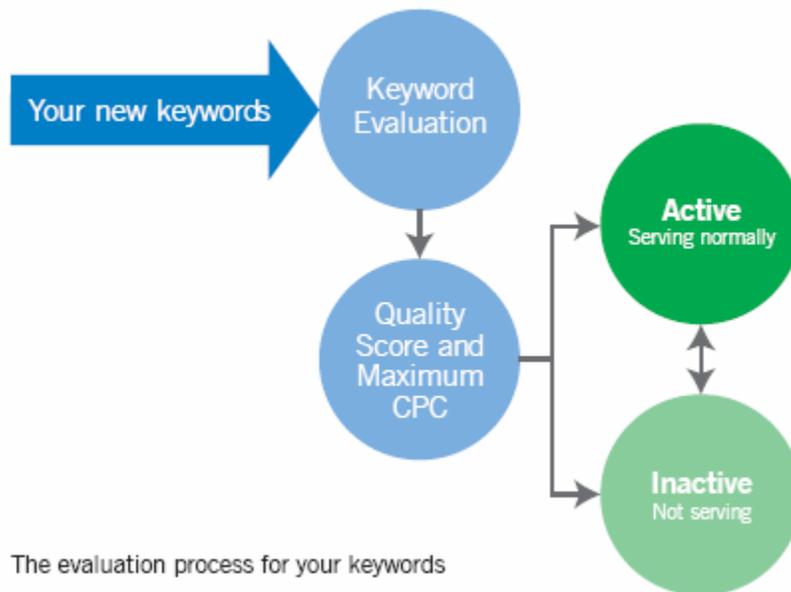

TIP: It is possible to view the current quality score status for your keywords. To see your Quality Score in your account statistics follow the steps listed at <http://www.google.com/support/grants/bin/static.py?page=qualityscore.cs>.

'Inactive for search' keywords

A keyword is marked inactive for search if it doesn't have a high enough Quality Score and cost-per-click (CPC) bid to trigger ads on Google. This means your keyword's CPC bid doesn't meet the quality-based minimum bid (See diagram below).

You may find that one of your keywords is marked inactive for search although no other or very few ads are appearing for a search on this particular keyword. Your quality score is specific to your account so the level of competitor bidding on any one keyword will not affect your keyword status. You will also find information on how Quality Score affects your keyword status at

<http://www.google.com/support/grants/bin/static.py?page=qualityscore.cs>.

The evaluation process for your keywords

How can I activate an inactive keyword when CPC's are limited to a \$1.00?

Since your Google Grants account is limited to a \$1.00 max CPC, you are unable to activate keywords whose minimum bid is above \$1.00 by raising your bid.

If you want to activate a keyword that is 'inactive for search', we suggest you first try optimizing your keyword, ad text, and campaign.

For example, consider adding your keyword to your ad text, or changing your campaign targeting options. Please ensure that the keyword is highly targeted and relevant, as it will be difficult to reactivate general keywords through optimization.

Additional resources & support

I. Where can I find additional information?

Below are additional resources that will also be useful to you:

Help Center – Frequently asked questions and help documents, including text and multimedia lessons

<http://www.google.com/support/grants/>

Google Grants Blog – Frequent updates about the Google Grants Program

<http://googlegrants.blogspot.com/>

Google Grants Group – Learn from other users and nonprofits

<http://groups.google.com/group/googlegrants-help>

II. Who can I contact if I need help?

If you get really stuck, Google has email support to help. Please note that contacting email support should be your last resort. There will be a 3-5 business day turnaround for a response so if you need a quick answer, we recommend you search through this guide and our online help resources first.

If you do require email support, please send your query to the mailbox below.
